PROFESSIONAL SUMMARY

Junior full-stack web developer completing the YouthCode Coding Academy (Life Choices Academy), building web applications end to end with Vue 3, Node.js and Express through team projects. Experienced in accessible, responsive front-end work and in back-end authentication, middleware and REST APIs. A former tutor who explains technical ideas clearly, learns quickly and works well in a team. Looking for an entry-level IT or web development opportunity.

TECHNICAL SKILLS

Front-end: HTML, CSS, JavaScript, Vue 3, Vite, responsive and accessible design

Back-end: Node.js, Express, REST APIs, JSON, MySQL2, middleware, user authentication, controllers, models and routes

Languages and tools: JavaScript, Python (introductory), Git, GitHub, Thunder Client (API testing)

PROJECTS

ArtisanHub

Team of three

Handmade-goods marketplace · Vue 3, Vite, Node.js · github.com/Khaalid-hattas/Group6-E-COMMERCE

- Owned the middleware layer, including user authentication
- Built the Home, About, Register and Login pages
- Built the shared Navbar, Footer and global stylesheet

ModernTech HR Suite

Team project

HR management web application · Full-stack · github.com/MattLCA/Module-2-Core-Project

- Owned the Attendance, Leave and Time Off pages, first built against dummy data and then connected to the back end
- Fixed a data-flow bug between the Leave and Time Off features caused by ID type coercion and duplicate records
- Scoped CSS with page-specific prefixes to stop styles bleeding across pages

TutorConnect

Team of six

Tutoring platform · HTML, CSS, accessible design · github.com/imaanabrahams/Tutor_Connect

- Built the contact form with an accessible field structure and clear labels, so keyboard and screen-reader users can complete it without confusion

EDUCATION & TRAINING

YouthCode Project (Coding Academy)

Apr 2026 – Present

Life Choices Academy, Cape Town · A free, year-long coding programme combining web development with professional development

- **Foundation:** Researched an ICT career path, wrote a reflective essay on my career goals and was introduced to programming with Python
- **Front-end:** Built responsive, accessible interfaces with HTML, CSS and Vue 3 and practised team development with Git and GitHub
- **Back-end:** Built server-side features with controllers, models, routes and middleware, including user authentication

National Senior Certificate (Matric)

Jan – Dec 2025

Centre of Science and Technology, Cape Town

WORK EXPERIENCE

Tutor

Feb 2026 – Apr 2026

LightHouse Academy, Cape Town

- Tutored Grade 7 and 8 learners in Mathematics, language and science subjects, explaining concepts step by step, the same skill needed to document code and support non-technical users
- Identified where each learner was stuck and adjusted my explanations, the same troubleshooting approach I use when debugging
- Gave constructive feedback and encouraged learners through difficult topics, building patience and clear communication
- Prepared and delivered sessions across three subject areas, managing my time and switching between topics

Floor Assistant (Seasonal)

Dec 2025

Mimi Q, Cape Town

- Assisted customers with their shopping and resolved queries quickly, much like first-line support
- Checked and packed stock accurately during the peak festive season, building the attention to detail needed in testing and data work
- Worked in a team in a fast-moving environment, communicating clearly to keep the floor running smoothly

VOLUNTEERING & EXTRACURRICULAR ACTIVITIES

YouLead Initiative (Youth Climate Leadership Programme)

2022

Project 90 by 2030, Cape Town

- Completed a youth leadership and climate activism programme, building public speaking, leadership and teamwork skills that I now use when presenting projects and working in development teams
- Earned the Bronze Award (The President's Award for Youth Empowerment) for community service completed through the programme
- Completed a 4-day Mobile Journalism (MoJo) course and learned videography, building digital content and storytelling skills useful for product demos and user-facing content

SOFT SKILLS

Problem solving · Teamwork and collaboration (Git feature branches) · Communication · Adaptability and learning · Attention to detail · Time management · Initiative and creativity · Ownership and leadership
